Auto Care Products, Inc.

ProSeal™

U-shaped Garage Door Bottom Seal

Installation Instructions

1. Remove existing garage door bottom seal. Some garage door manufacturers will pinch the aluminum track to hold the bottom seal in place. To open a pinched track, insert a flathead screw driver, into the end of the track, and gently pry open the end, just enough to allow removal of the old door seal. Both ends of the track may need to be opened.

2. Make sure any debris in the track has been removed and that it is clean and dry.

3. Starting at either end of the garage door, insert the ¼" T-Ends, attached to the ProSeal™ Garage Door Bottom Seal, into the track. Next, slide the ProSeal™ into the track, until it reaches the opposite side.

4. Using a scissors, trim off the excess ProSeal™. If your door seal track was pinched and you wish to pinch it back together, use pliers to gently pinch the track back into place.
